Cloud Server Service

WebHost is now entered **Cloud Era**! Our Cloud Server can perform like a traditional Physical Server, but more **flexible** and **expandable**.

☁ **Cost Saving** - With "pay-as-you-go" concept, large initial investment on hardware is not required and you can handle your IT budget more efficiently.

☁ **High Flexibility & Scalability** - Cloud Server is invented and designed to allow you to scale up your server specifications easily and conveniently, to match your market demand anytime.

☁ **High Availability** - As computer resource is ready in our Cloud, dedicated system and network environment can be available in a short time.

☁ **High Reliability** - With clustering features, spare server in Cloud will take over the role when the primary server is down. It ensures your business keeps running and service continues to perform as usual.

Characteristic of WebHost Cloud Server:

Latest Secure Cloud Technology
- No doubt that Cloud technology has high flexibility and availability, at the same time, secure issue is the most concern. With using WebHost Cloud Server, security is hardened by well-known network equipment, higher level Juniper Hypervisor firewall. It ensures the accurate protection measures running after auto transfer of Cloud server (V-Motion).

Well Utilize Server Resource
- To operate with VMware® technology, different server resources are integrated in the Cloud Server. With synergistic effect, server resources can be well utilized with result $1+1 > 2$.

Flexible Resource Allocation
- Can self-allocate CPU, Memory, Storage and network resources directly to different server host anytime. Spending on particular resource upgrade is enough. Your investment can be applied more efficient and flexible.

Pay As You Go
- No matter software or hardware, they are all ready in our Cloud Server for our client. Without extra server installation, new server can be ready within few hours, cost on license can be lowered at the same time.

Self Recover Program
- When there is system failure, server resource will be re-allocated automatically to ensure all features can be run continuously.

Uninterrupted System Upgrade
- Without any server down-time, resource can be upgraded and re-allocated anytime, includes software installation. Therefore users can start to have their own server with lowest cost, lowest barriers.

Tailor-made Network Environment
- According to your changing business needs, we can help you run your server with the most appropriate hardware, application, system, internal and external infrastructure, with the most cost-effective combination.

WEB HOST LIMITED

WebHost Cloud Server Hosting Plan

	Copper	Silver	Gold	Platinum	Diamond	Titanium
Monthly Fee	HK$628	HK$878	HK$1498	HK$2128	HK$2878	HK$4498
Number of vCPU	1	1	2	4	4	8
Storage	20 GB	40 GB	60 GB	100 GB	250 GB	500 GB
Ram	1 GB	2 GB	4 GB	8 GB	16 GB	32 GB
IP Address	1	1	1	1	2	2
Offsite Backup	Included (maximum size same as Cloud server storage)					
Monthly transfer limit	100 GB	100 GB	Unlimited			

Payment Terms	
24 months prepayment	10% off
12 months prepayment	Waived Setup Fee

Supporting Features	
Operating Systems	Ubuntu / Centos / Debian / Windows [2] / By Request
Supporting Languages	PHP/ Perl/ CGI-bin/ SSI/ ASP/ ASP.Net
Database	MySQL/ MS Access / MS SQL Express
Web Server	Apache/ Tomcat/ IIS
Email Service	Qmail/ Sendmail/ Postfix
Full Root Access [3]	By Request
Service Guarantee	99.9% Sever Uptime UPS Power Failure Backups 24-hr Telephone & Email Technical Support 30-day Money Back Guarantee

Value-Added Services					
Licensed MS SQL Server 2016	$600/ month (Core License, Unlimited User) x number of vCPU				
PLESK Control Panel License	$300/ month (for 100 domains)				
PLESK Dr. Web anti-virus	$250/ month				
PLESK SpamAssassin	$250/ month				
PLESK Tomcat/ JSP support	$250/ month				
Shared Firewall	$200/ month				
Additional Storage	$200/month(10GB) $500/month(50GB)	$900/month(100GB) $1800/month(300GB) $2500/month(1TB)			
Additional Data Traffic	$200/ month (300G transfer limit)	Unlimited			
Additional 1 IP address	$400/ month				

Note:

1. $500 setup fee will be charged if shorter payment term is required.
2. Windows Server will occupy around 15-25GB storage.
3. After the initial server installation, $500 setup fee will be charged for any change of server configuration and re-installation.
4. If full root access is given, WebHost will not be responsible for any server corruption. $500 will be charged for server reset.
5. Only latest 7 days log files will be kept for internal use. $500 will be charged for retrieving log files.
6. Copper package only support Linux OS.
