

## How to setup an email account in IOS11 (iPad) :

1. Open <Setting> in app menu
2. Click<Mail, Contacts, Calendars>
3. Click<Add Account>

4. Click<Other>

5. Click<Add Mail Account>

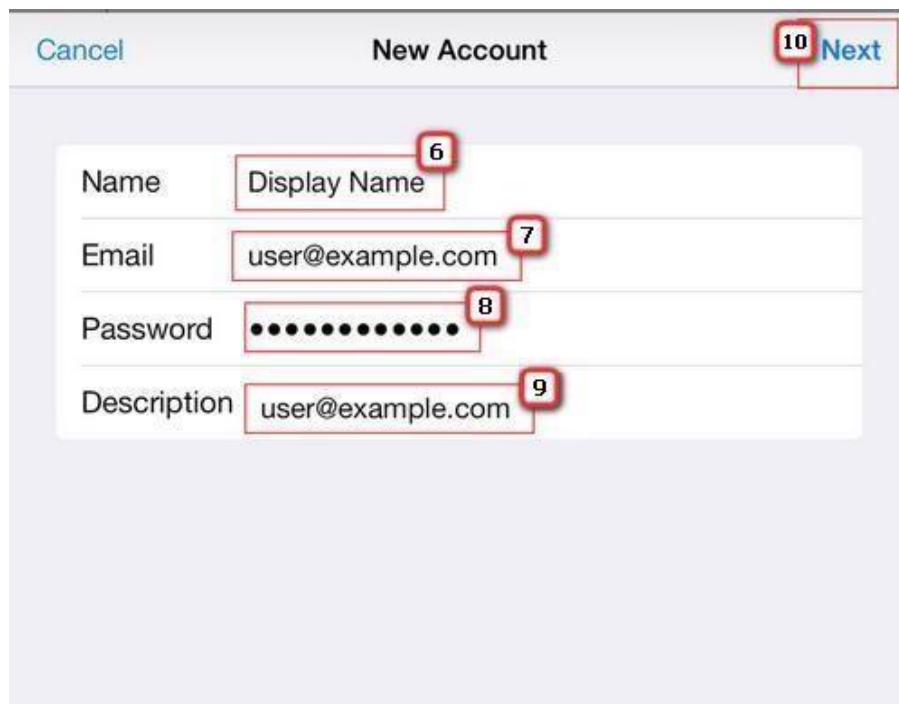

The screenshot displays the 'Add Mail Account' interface. On the left, a list of account types is shown: iCloud, Exchange, Google, YAHOO!, Aol., Outlook.com, and Other. The 'Other' option is highlighted with a red box and a small red square containing the number '4'. On the right, the 'MAIL' section is expanded, showing 'Add Mail Account' highlighted with a red box and a small red square containing the number '5'. Below the 'MAIL' section are the 'CONTACTS' and 'CALENDARS' sections, each with their respective options: 'Add LDAP Account' and 'Add CardDAV Account' under CONTACTS; 'Add CalDAV Account' and 'Add Subscribed Calendar' under CALENDARS.

**6. Name:** Enter your **preferred display name** (e.g. Display Name)

**7. Email:** Enter your **email address** (e.g. user@example.com)

**8. Password:** Enter your **email password**

**9. Description:** Enter **email address** (e.g. user@example.com) **10.** Click<Next>

The screenshot shows a 'New Account' setup window with a 'Cancel' button on the left and a 'Next' button on the right. The 'Next' button is highlighted with a red box and the number 10. Below the buttons are four input fields, each with a red box and a number indicating the step:

- 6** Name: Display Name
- 7** Email: user@example.com
- 8** Password: [masked with dots]
- 9** Description: user@example.com

**11.** Click <IMAP>

**12. Host Name:** Enter <Domain without 'dot'> .securemail.hk(e.g. examplecom.securemail.hk)

**13. User Name:** Enter your **email address** (e.g. user@example.com)

**14. Password:** Enter your **email password**

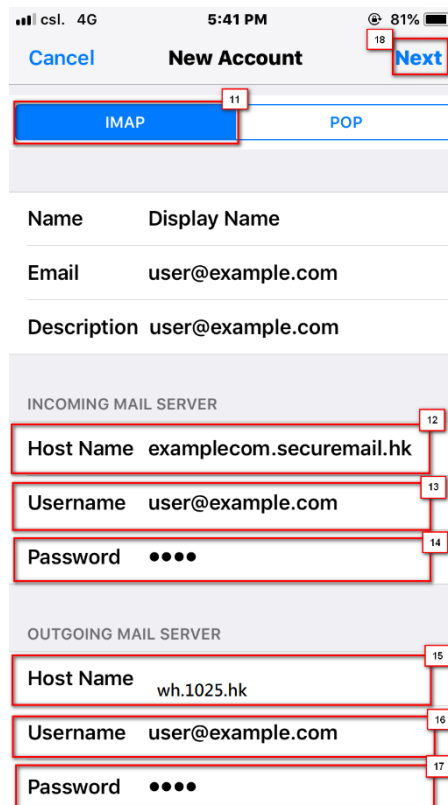

**15. Host Name\*:** Enter <wh.1025.hk>

\* Not subscribed our SMTP service yet? Please contact Webhost Customer Service Department for more details:  
 Phone: 25281683  
 Email Address: service@webhost.com.hk

**16. User Name:** Enter your **email address** (e.g. user@example.com)

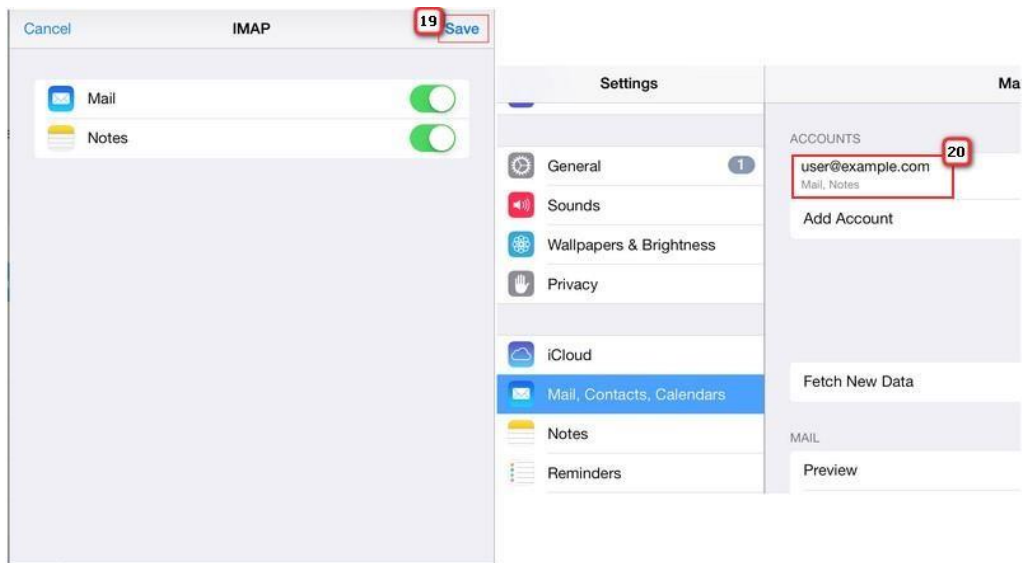

**17. Password:** Enter your **email password**

**18.** Click<Next>

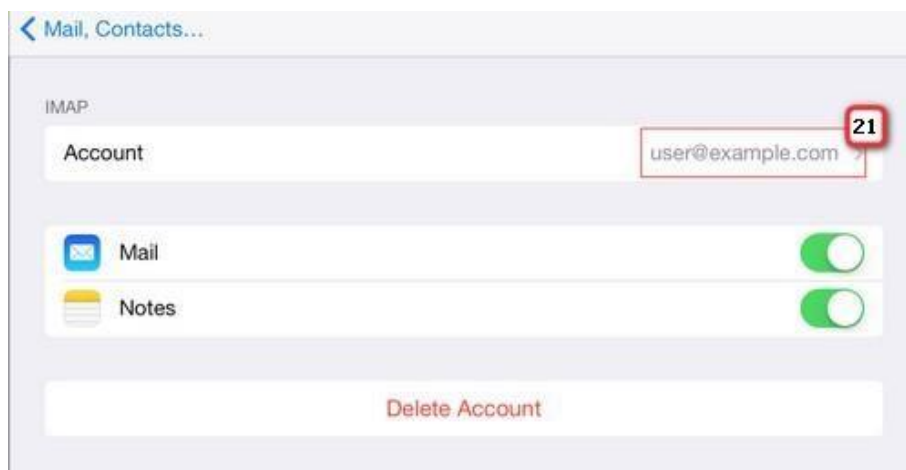

19. Click <Save>

20. Click the **email account** that you just created (e.g. user@example.com)

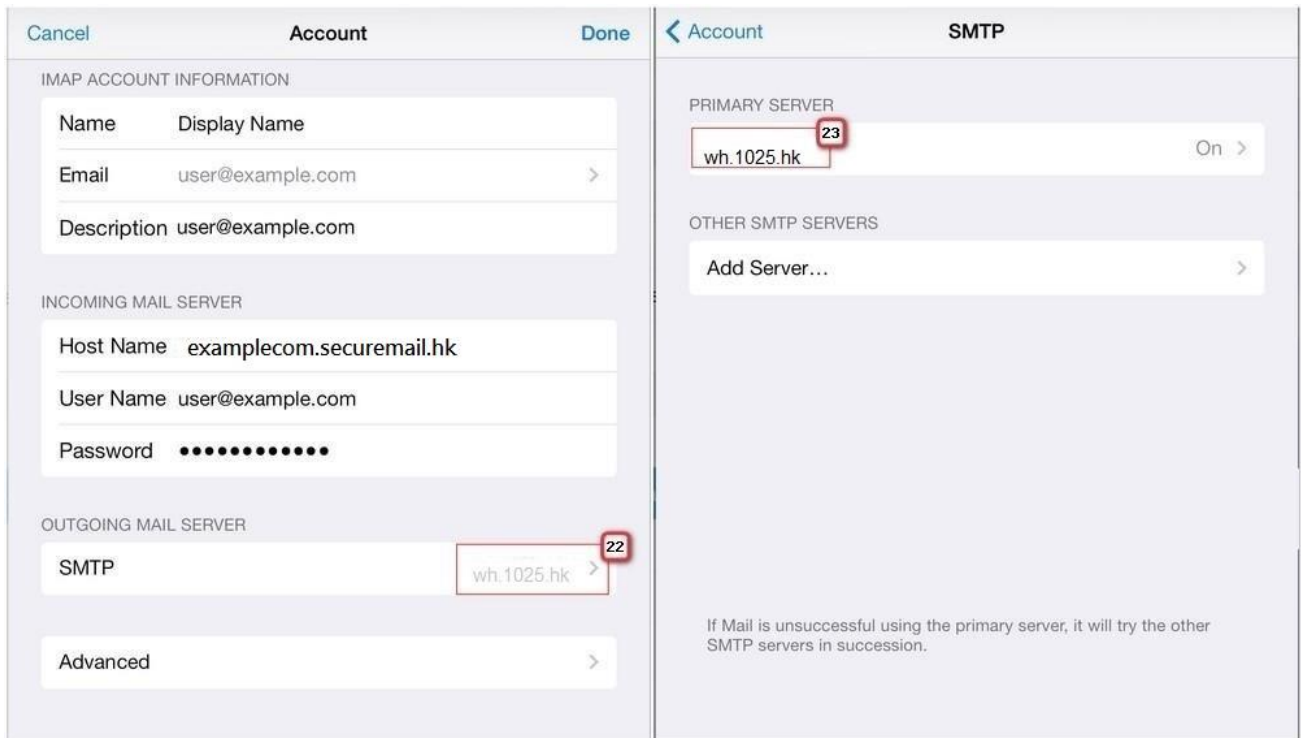

21. Click the **email account** that you just created again (e.g. user@example.com)

**22.** Click SMTP <wh.1025.hk>

**23.** Click <wh1025.hk> again

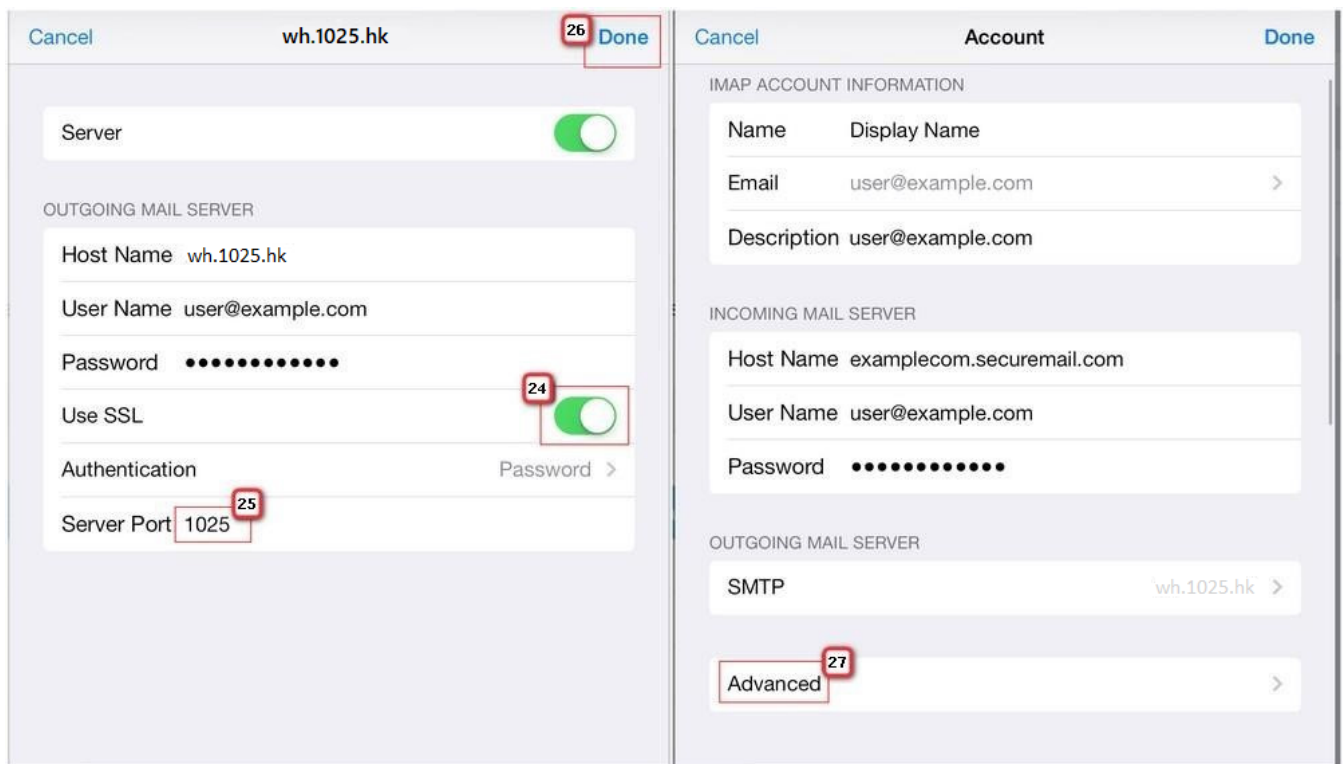

The screenshot shows two panels of the iOS Mail Setup Assistant. The left panel is titled 'Account' and contains sections for 'IMAP ACCOUNT INFORMATION', 'INCOMING MAIL SERVER', and 'OUTGOING MAIL SERVER'. The 'OUTGOING MAIL SERVER' section has a dropdown menu with 'SMTP' selected and 'wh.1025.hk' chosen, with a red box and the number '22' highlighting it. The right panel is titled 'SMTP' and shows 'PRIMARY SERVER' with 'wh.1025.hk' selected and 'On' status, with a red box and the number '23' highlighting it. Below this is an 'OTHER SMTP SERVERS' section with an 'Add Server...' button. At the bottom of the right panel, there is a note: 'If Mail is unsuccessful using the primary server, it will try the other SMTP servers in succession.'

**24.** Turn on <Use SSL>

**25.** Server Port: Enter <1025>

**26.** Click <Done>

**27.** Click <Advanced>

The image displays two screenshots of an iPhone mail setup interface. The left screenshot shows the configuration for an outgoing mail server with the host name 'wh.1025.hk'. The 'Use SSL' toggle is turned on (24), and the 'Server Port' is set to '1025' (25). The 'Done' button is highlighted (26). The right screenshot shows the 'Account' configuration page. The 'Advanced' option is highlighted (27). The account information includes 'Name', 'Display Name', 'Email' (user@example.com), and 'Description' (user@example.com). The incoming mail server is 'examplecom.securemail.com' and the outgoing mail server is 'SMTP' (wh.1025.hk).

**28.**Turn on <Use SSL>

**29.**Server Port: Enter <993>

**30.**Click<Account>
